

PASSENGER TERMINAL AMSTERDAM

SUSTAINABLE HOSTING OF EVENTS

PTA participates in the Green Globe program, which commits to doing business in a sustainable way. We do this together with colleagues, suppliers and business associates. We aim to save energy and water, recycle as much as possible, offer the possibility of organizing zero-waste events and are committed to various social initiatives.

Green Globe

Green Globe is a global certification program for sustainability performance of companies in the travel and hospitality industry. This program helps raise awareness among colleagues, suppliers and visitors, with the aim of reducing our CO2 footprint and making the world a little greener, together!

0%

Zero-waste events

Together with our supplier Renewi, we offer our event organizers the opportunity to organize a 100% sustainable event with a zero-waste

WASTE

- Separate collection of waste; plastic, glass, paper
- Cartridges, batteries, light bulbs, cans and empty PET bottles are collected and recycled
- Our caterer The Food Line-up stopped the use of disposables to reduce waste
- Twice a year we organize a clean-up campaign around the terminal and surroundings

ENERGY

- LED lighting
- Lighting plan for the building/night
- Heating plan for the building/night
- Use of heat/cold storage for heating the building
- Charging facilities in the terminal for electric cars
- Regular and proper maintenance of electrical installations ensures a longer life

WATER

- All taps in the toilets work on infrared and are water-saving
- Toilet flush mechanisms are water-saving

SOCIAL

- PTA is a good, social employer with consideration for its employees and the environment
- Personnel policy is aimed at ensuring that the working environment is a pleasant, inspiring and safe place for everyone who works here
- Deposits on cans and plastic bottles are donated
- Each year, PTA chooses a good cause within the city of Amsterdam to organize something selflessly.
- Once a year PTA makes the terminal available for a benefit event
- Provide guided tours for local schools and community initiatives

SUPPLIERS

- Wherever possible, we work with local suppliers. This saves emissions and stimulates local businesses
- All our suppliers work sustainably in their own way. This could be certification, use of environmentally friendly means or electric driving, for example
- House caterers come from the Amsterdam area and are each green in their own way. Either because of the products, accommodation or waste flows.
